

## Neighborhood Bird Checklist

The following is a list of birds that have been observed in Hudson Park, in the surrounding neighborhood, and on and along Lake Monona (roughly from Yahara Park on the south to Olbrich Park on the north) on Madison's East Side. A few of the species are common year-round residents, some are found here in summer only, and many occur in the area only as spring or fall migrants. Species indicated by (r) are rarely seen in the neighborhood, occurring here only once or twice a year or every few years. *Italicized* names indicate species that have been observed nesting, or that are likely to nest, in Hudson Park and the immediate vicinity. This checklist was prepared in October 1999 by Tod Highsmith (highsmith@mailbag.com, 242-1168) and Dave Fallow (dfallow@yahoo.com) who, between them, have seen all the species on this list in the Hudson Park area. If you have questions about this checklist or about birds in the Hudson Park neighborhood, please feel free to contact them.
